

Please, please do not touch XM radio. It has been a constant joy to listen, and in effect, I have even purchased more music because of it. It is a great, respectable service, so please do not interfere with its offering. Once one part is intruded upon, there is nothing to stop the NAB from taking more away from XM radio. We pay for this service, and in a free economy, it is our right and privilege to benefit from services like XM radio. Thank you for your thought and consideration!
